

JIF ROAD GAUGE

ROAD FLOOD WARNING

The JIF Road Flood Gauge (RFG) has been designed and manufactured in Brunei Darussalam.

The acrylic vandal / UV resistant staff gauge is bonded to a sturdy steel baked enamel painted backplane. This eliminates theft and also damage from high water flows.

The gauge assembly is permanently welded to a standard length steel pipe. This assembly is designed for securing in to a concrete base.

Reflective warning symbols allow easy visibility at night. Standard graduation allows easy reporting of flood levels to the relevant authorities.

FEATURES

- Gauge plate acrylic vandal and UV resistant plastic
- Gauge plate numbering permanently etched on rear of gauge
- 3M reflective warning and JKR logo on front
- Back plane colour light grey (other colours available)
- Staff plate dimensions 1000mm x 150mm
- Epoxy painted galvanised steel mounting pole 1000m in length
